HRD Singapore Pte. Ltd.

- Developed a feature in the system that can track the status of the containers that was used for importing and exporting of product
- Maintained multiple system for Logistic Department
- Generates report that was requested by the Logistic Department

PROJECTS

Cash Flow Tracker Website

ASP .Net Core 9, Entity Framework Core, Angular 20, Tailwind, PrimeNG, MS SQL, Postman, GitHub Actions, Azure App Service, Vercel

- Built a financial tracker system with **.NET Core Web API** and **Angular** frontend.
- Implemented strict **DTO alignment** (ISO date strings, PHP Peso currency formatting).
- Designed **6-month range aggregation** for monthly breakdowns and reporting.
- Deployed backend via **Azure App Service** with automated **CI/CD pipelines**; frontend hosted on **Vercel**.

User Manager API

ASP .Net Core 8, Entity Framework Core, MS SQL, Postman

- Developed and implemented a User Management API using ASP.NET Core Web API for efficient user account handling.
- Integrated Microsoft SQL Server with Entity Framework Core (EF Core) for seamless data management and retrieval.
- Integrated Google SMTP to enable secure email notifications and account-related communications.
- Implemented Argon2 for strong password hashing, enhancing security against brute-force attacks.
- Strengthened account security by implementing account lockout and attempts timeout features to mitigate unauthorized login attempts.
